StreamState Enumeration

A value describing the state of a [StreamInterface](#) or derived object.

Syntax

```
enum StreamState {  
    SS_CLOSED,  
    SS_OPENING,  
    SS_OPEN };
```

Values

SS_CLOSED

The stream has closed.

SS_OPENING

The stream is in the process of opening, but not yet readable or writable.

SS_OPEN

The stream is open for reading or writing.
